PROJECT SUN STREAK

21 Oct 88

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

TNG TARGET NUMBER: 0049 SESSION NUMBER: 1 of 1
 DATE OF SESSION: 20 OCT 88 DATE OF REPORT: 20 OCT 88
 START: 0851 END: 1005
 METHODOLOGY: CRV VIEWER IDENTIFICATION: 025
 EVALUATION: 3 MONITOR: 018

1. (S/NF/SK) SITE: Greek Orthodox monastery at Meteora.
2. (S/NF/SK) MISSION: To access and describe the target using stages I through VI, with particular attention to Stage VI modeling techniques.
3. (S/NF/SK) VIEWER CUEING: "Site is training target #0049."
4. (S/NF/SK) COMMENTS:
 - a. Inclemencies: None reported.
 - b. 025 quickly experienced good site contact, and only a minor amount of AOL throughout the session. 025 appeared "gun-shy" throughout the beginning of the session, after yesterday's almost total failure, which had been due to AOL drive. This session, 025 had to force him-/herself to declare anything as a definite perception, and work was done on recouping confidence, once a session such as yesterday's has been experienced.
 - c. In stage 6, only modeling was tried. This was performed well, but again, accurate dimensions were changed, due to a hesitancy to mold anything definite. The result is still acceptable (see photo in feedback), showing the major gestalts of the site.

5. EVALUATION:

a. Teacher's: In this session, O25 learned that there is a strong tendency to allow prior successes/failures to influence future work. Going into a session with an attitude of "I can't do this!" or "Easy! No sweat!" are both forms of AOL, in their own rights, and will color the results for better or worse. The necessity of keeping each session and each target dependant on its own merits, without dragging outside influences into a session, was discussed, using this good session which followed a bad one as an example.

b. Director's:

O25
20 October 1988

Summary

The site is a land and structure interface where motion is present. The lay of the land is high and low and there is a beautiful view. The large building has people in it who are pleasant, enjoying being helpful, and are interested in the working activities. They are watching to insure things operate alright. This structure is isolated and self sufficient (autonomical). Precautionary measures are undertaken and maintenance is sustained.
